How is this real

Kindergarten vaccinations are down so here's CBS telling you to give your infants the Covid vaccine and literally showing images of mercury and aluminum and telling you WHY THEY'RE GOOD FOR YOUR KIDS TO TAKE THEM

They are literally telling you to "stick the course" and get all your childhood vaccines against the new recommendations of HHS

The media needs to go bankrupt

A video player interface showing a woman with dark hair speaking. A white text box with black text is overlaid on the video, reading: "Vaccination rates for kindergartners continue on downward trend". The video player includes a play button, a progress bar showing 0:00 / 2:18, a volume icon, a full screen icon, and a menu icon.

Bull, aluminum goes pass the blood barrier in the brain and stays there.

The confusion isn't a bug, it's a feature. When the nation's top health officials are chosen for their anti-science résumés, a measles resurgence is just the opening act of a very predictable tragedy.

Since Feb 2025, HHS Sec. RFK Jr. has filled the CDC's advisory panel with vaccine skeptics, forcing the American Academy of Pediatrics to issue its own conflicting guidance on Aug 19. The result of this engineered chaos? Measles cases have quadrupled to 1,333 this year as kindergarten MMR coverage dropped to 92.5%.

Choosing ideology over immunity isn't freedom. It's a public health surrender.

Who is this liar?

Ethyl mercury is deposited in the brain as inorganic mercury, the most dangerous kind.

Injected aluminum is 100% bioavailable and crosses the blood/brain barrier.

The covid vax was one of only two placebo-controlled but didn't complete trials before given.

Absolute gaslighting. Anyone spreading this propoganda, such as the hack saying children are at high risk for covid, should be held accountable for their lies. Crimes against humanity.

No never. My adult pregnant daughters are in randomly injection their science experiments into their unborn babies.....are they crazy? Parents help guide adult children because the media and big pharma only care about their bottom line which is slowly crumbling beneath them and Fauci and Gates no it. That's why they are all in PANIC mode. Have faith. If nature didn't make it don't take it. Our great grandma's have always said that.

They need to be sued for failing to diligently investigate the truth on vaccines, but huge ad dollars come from Big Pharma.

Big Pharma keeps the media alive with lots of big money.

The entire MD medical system must be transitioned to an ND and DO system.

What is an ND @grok?

What is a DO?

Wouldn't a wider range of medical professionals improve our medical system in a beautiful and natural way?

Why can't we re-engineer our medical science and education system to add depth

of understanding from more DOs and NDs? MDs seem to dominate the narrative to a fault.
