NEW: ANOTHER FAUCI BIOLAB ACCIDENT

We just exposed another recent bioagent accident at one of Fauci's most dangerous animal labs.

And it's the second accident we exposed at this NIH lab just this year!

We uncovered documents revealing the NIH quietly admitted that an unspecified deadly pathogen was "released, lost, or stolen" from its Rocky Mountain Lab in Montana in February.

In January, we broke the viral news about another NIH lab accident at RML that exposed a staffer to Crimean-Congo Hemorrhagic Fever, a deadly foreign virus with a 40% fatality rate.

Just last week, we released a shocking whistleblower letter that revealed the alleged details of that dangerous animal lab breach:

An NIH lab staffer was allegedly "bitten by an infected monkey (macaque) that was being tortured (infected and sickened with no pain mitigation)."

The anonymous sources claimed the NIH was in "full coverup mode" about the monkey bite.

And we just blew the lid off yet another shocking scandal at RML:

Animal experimenter Vincent Munster was suspended and allegedly investigated by the FBI for smuggling dangerous viruses into the US from Africa.

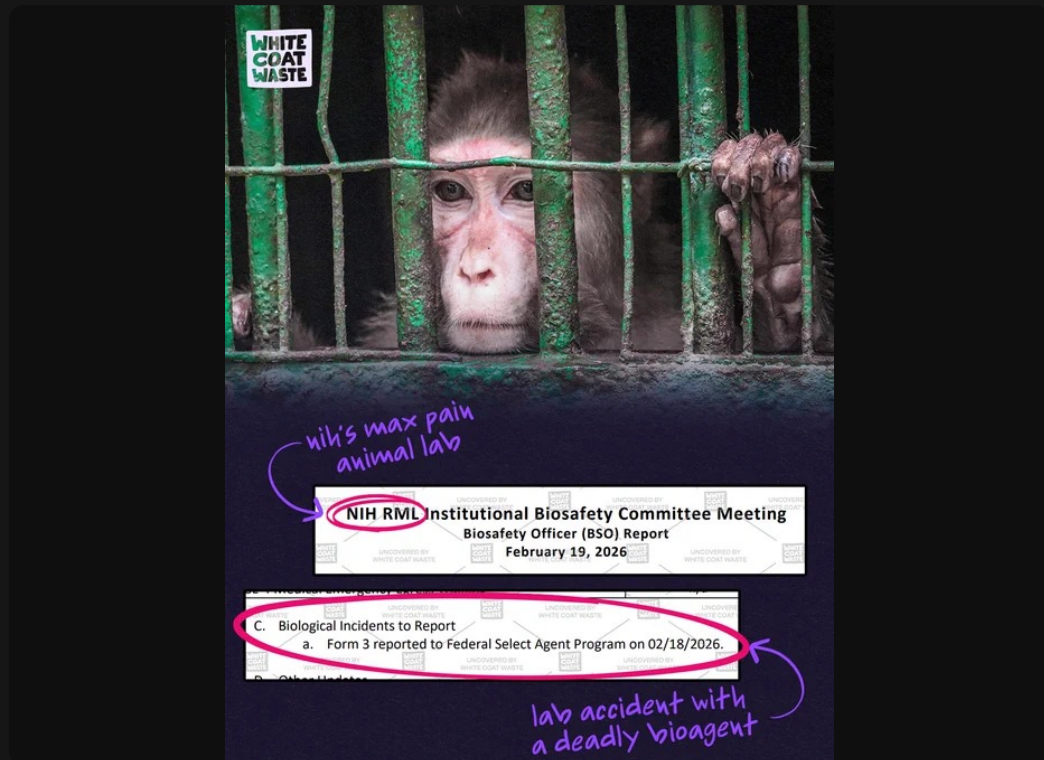

Munster is a mad scientist who infects primates, bats and other animals with CCHF, hantavirus, Ebola, and other deadly bioagents.

We were the first to expose Fauci's funding for the gain-of-function animal tests in Wuhan that likely caused COVID. But the NIH hasn't learned its lesson.

We are running billboards near RML right now targeting Munster's deadly animal tests and urging RFK Jr. to shut them down!

Secretary RFK Jr. needs to answer:

How many more dangerous accidents at RML need to happen before you shut it down?

Find something to charge Fauci with that happened after the pardon. Convict him. Let him die in prison.

Fauci and the rest of his crew at NIH including all doctors and scientists involved should be in cells under a prison. Politicians who knew but did nothing but fund the insanity should be there too.

For a human being to be cruel to an innocent animal through torture is inhumanity. There is no rationale for it.

Fauci put a neck cone on a dog and infected it with fleas just to see what would happen. I don't know how long it took but the dog died.

What is wrong with these biological technicians and Frankenstein doctors. When is someone going to put their foot down and cut the funding of fauci's children or just expose the entire system!

Several times monkeys "escaped" around the USA! South Carolina, Georgia, some in Florida, too. Every time, I think they are infected and released by Dr. Falsey.

They were doing that kind of testing in San Antonio's -Goodall facility in the 80s. The place with the Huge outdoor baboon enclosure. Supposed to be such an animal advocate but put her name on a research lab, probably to deflect thoughts of the evil doings inside. Not a fan

Anthony Fauci funded over 120 Bio-Hazardous Labs around the world, most in foreign nations. This includes the Wuhan Lab in China, which received large grants and funds from the NIAID and NIH, with CIA/IC money laundered through USAID. He also signed off on buying and shipping export munitions controlled CRISPR machines to them for illegal Gain of Function (GoF) lab creations. THE ONLY purpose for the CRISPR machines in this manner is for creating illegal Bio-Warfare weapons of mass murder. Not a single cure or new antibiotic has come from the billions of USD and these labs.

In the eyes of any educated observer, Fauci is a narcissistic psychopath who views himself as completely beyond the reach of any earthly justice, and, indeed, he is, thanks to Biden, who extended him a blanket pardon.

Thousands died so that the Democrats could steal an election.
