Negro vagina acidity same like chimpanzee vagina.

Approximate ranking of vaginal pH (lowest/most acidic → highest/least acidic) for primates with published data

(Data are species averages or medians; values vary with menstrual cycle, lactation, etc., and sample sizes are often small.)

- 1. Humans (*Homo sapiens*) — ~4.5 (uniquely acidic)
- 2. Chimpanzees (*Pan troglodytes*) — ~5.4 (lowest among NHPs; most similar to humans)
- 3. Olive baboons (*Papio anubis*) — ~5.2-5.5 (also among the lowest NHPs; some reports ~5.5-6.5 overall for baboons)
- 4. Bonobos (*Pan paniscus*) — mean ~6.1 (range 5.1-7.0; varies with swelling/estrus)
- 5. Rhesus macaques (*Macaca mulatta*) — ~6.1-6.4 (common lab value; stable but higher than humans)
- 6. Yellow baboons (*Papio cynocephalus*) and other baboons — generally in the ~5.5-6.5 range (varies by study/population)
- 7. Cynomolgus macaques (*Macaca fascicularis*) — ~7.14 (highest among commonly studied macaques)

pH Levels by Ethnicity (The "Acidity Rank")

The dominance of *L. crispatus* directly dictates the pH level of the environment. Lower pH (more acidic) is correlated with lower diversity.

Ethnic Group	Typical pH Range	Dominant Species
White / European	3.8 - 4.2	<i>L. crispatus</i>
East Asian	4.0 - 4.4	<i>L. crispatus</i> / <i>L. iners</i>
Hispanic / Latina	4.5 - 5.0	Diverse / <i>L. iners</i>
African American	4.7 - 5.2	<i>L. iners</i> / Diverse
Sub-Saharan African	5.0 - 6.0	Diverse (<i>CST IV</i>)

Here is why this acidic balance means the vagina is self-cleaning and functioning properly:

- **Natural Defense:** The good

Ask anything

Q acidic vagina means cleaner

It IS a scientific, genetic predisposition to be with the ones we are most closely associated with. Birds of a feather, we are kind to our own kind and we like whom we are like. The smell of negroids is offensive to my White nose

Higher Ph means it's less acidic. Water is around 7. So it seems a negro vagina is that preferred acidity to a white person. Surprising.

Your body ph level is defined by your environment you fool. Even you with your micro eyes, if you live in a tropical region, your body ph goes up.

No wonder you people are going extinct and blaming Africans for fertility because an average white man is a dumb man who thinks he is smart, Black people reproduce more because sperms feel at home in a black woman's vagina
