"This is having a massive impact. I went and got my eyebrows done the other day, and my eyebrow technician said they're going to fire two technicians because all of their clients don't have money to come."

CNN's Ashley Allison discovers how the economy works.

Yes, the clip is authentic—Ashley Allison shared that anecdote on CNN while discussing potential SNAP cuts amid shutdown talks. Her eyebrow technician mentioned firing staff because clients lacked discretionary spending for services, illustrating ripple effects beyond direct beneficiaries. It's a real segment, though critics see it as a lightbulb moment on basic economics.
