A rare rodent-borne illness, "Hantavirus pulmonary syndrome", appeared inside Pfizer's 2021 post-authorization vaccine safety monitoring documents as a potential adverse event under observation.

Is this why they wanted the data sealed until 2085?

I am not honoring the "hantavirus" with an article, because it's a no-brainer for my readers that viruses have always been cover-ups for common poisonings and tools to force the masses into submission, as it happened during covid. Lyme was another mil-grade test and "global infection," but it was accompanied by "allergies" and "arthritis," which gave it away as a cover-up:

Anybody continuing to receive these Bio-Nanoweapon Injections is SUICIDAL.

Those pushing for them to be injected into the babies and children are nothing less than CRIMINALS AGAINST HUMANITY...EVIL to the extent that sin and evil are no longer recognized.

END THE MURDER and ATTEMPTED SLAVERY.

Arrest, hold and try those behind this continued poisoning of the world and population of all biological lifeforms...And, remove all wealth from all family associated with the Demons Camouflaged Humans behind this CRIME AGAINST ALL LIFE ON EARTH before public Capital Punishment streamed around the world on an endless loop.

Since the U.S is NOT holding these murderous, thieving Demons responsible, the U.S IS ALIGNED WITH EVIL AND IS JUST AS EVIL OR MORE SO THAN NAZI GERMANY, LONDON, BASEL SWITZERLAND, CHINA .
