Theo Von: "I have a lot of discomfort with America's relationship with Israel."

"I believe that group is, it just feels like a satanic regime. It feels like they just want to cause pain."

"They don't even know where all the bodies from Gaza are and they've already moved on to other places that they are attacking and America is associated with their attacks."

"I don't believe the Israeli leaders have any intention to stop that or they have any care for the American people."

"If we don't speak up now our children won't have the chance to speak up...either by law or worse."
